**TETHERED RACE CAR ASSOCIATION OF AUSTRALIA**

19 August 2019

Dear Tethered Car Enthusiast,

As President of the Tethered Race Car Association of Australia, it gives me great pleasure to welcome all competitors and friends to the 14th World Tethered Car Championships. While this is the fourth World Championships to be held in Australia, it is a first for the Queensland Miniature Race Car Club on what is potentially the fastest track in the world today.

Many competitors at this event share a strong bond built through successive visits and competitions throughout the world, and the spirit of cooperation, alongside a passion to create a new world record, underpins these meetings. This month marks sixty-one years of my involvement with tethered car racing in Australia and my enthusiasm remains strong for ongoing progress in our hobby.

The members of the Tethered Race Car Association of Australia join me in wishing you the best of running at this championship meeting and an enjoyable visit to Australia.

Best wishes,

A handwritten signature in black ink, which appears to read 'Tony Peacock'. The signature is written in a cursive style with a large, stylized 'T' and 'P'.

**Tony Peacock**

TRCAA President

## Queensland Miniature Race Car Club Inc

2 September 2019

Dear Tether Car Racers and Friends,

On behalf of the WMCR and the QMRCC, I sincerely welcome you to our Brisbane track on the occasion of the running of the 14th World Championship for tethered race cars.

We understand and appreciate the effort involved in travelling here, particularly from the northern hemisphere.

As two current world record speeds have already been set on this track, we are looking forward with anticipation towards further record speeds during this great event. Regardless of the desire we all have to win, I believe our major satisfaction will be gained if we can each achieve our individual personal best speeds.

The organising committee respectfully requests that particular attention is paid to all safety aspects during the running of the event.

Thank you to all who have and will contribute to the organising and running of our event, both competition wise, catering and socially.

Good luck to all participants during this first Brisbane World Championship competition held in, we trust, excellent weather conditions and great personal camaraderie amongst good friends from opposite sides of the world! We trust the satisfaction gained here will contribute to further visits to our track in the future when you will again be warmly welcomed.

Yours Sincerely,

**Rob Buckley**

Director WMCR and President QMRCC

Q6	Doug Harding	AUS	Harding Lotus 25	Go			
1123	Vladimir Kiper	RUS	Kiper	Novarossi			

The Tethered Race Car Association of Australia's 3.5 cc M Class is for open wheel cars with no suspension and spur gear drive that are powered by an un-piped 3.5 cc engine.

It is the most popular class in local race meetings, with virtually every club member owning and racing at least one.

The event run in conjunction with the World Championships is for both outright speed (where the fastest car wins) and a nominated speed competition, where a driver attempts to accurately predict the speed that their car will record, and the closest to their nominated is declared the winner.
